

ABSTRACT

A blender system ~~composed of~~ including a mixing base that is capable of
agitating the contents of a plurality of containers. The mixing base includes a ~~means for~~
rotating ~~[[a]]~~ shaft, a recessed well ~~positioned at a top of the mixing base~~, a pressure-
5 actuated switch positioned about the periphery of the recessed well, and a locking
groove. One container that may be used with the mixing base ~~is a container having~~ has
an opening at one end and a base at a second end, where the base is tapered. The
container also includes one or more locking members ~~and~~ in spaced relation about the
periphery of the container body. The container body may be provided with ~~also include~~
10 a handle ~~that is coupled to the exterior of the container~~. The container also includes a
ring that is selectively attachable and removable from the periphery of the opening such
that when the ring is coupled to the container, the user is able to drink from the
container without spilling or dripping.
